Inbound Rule

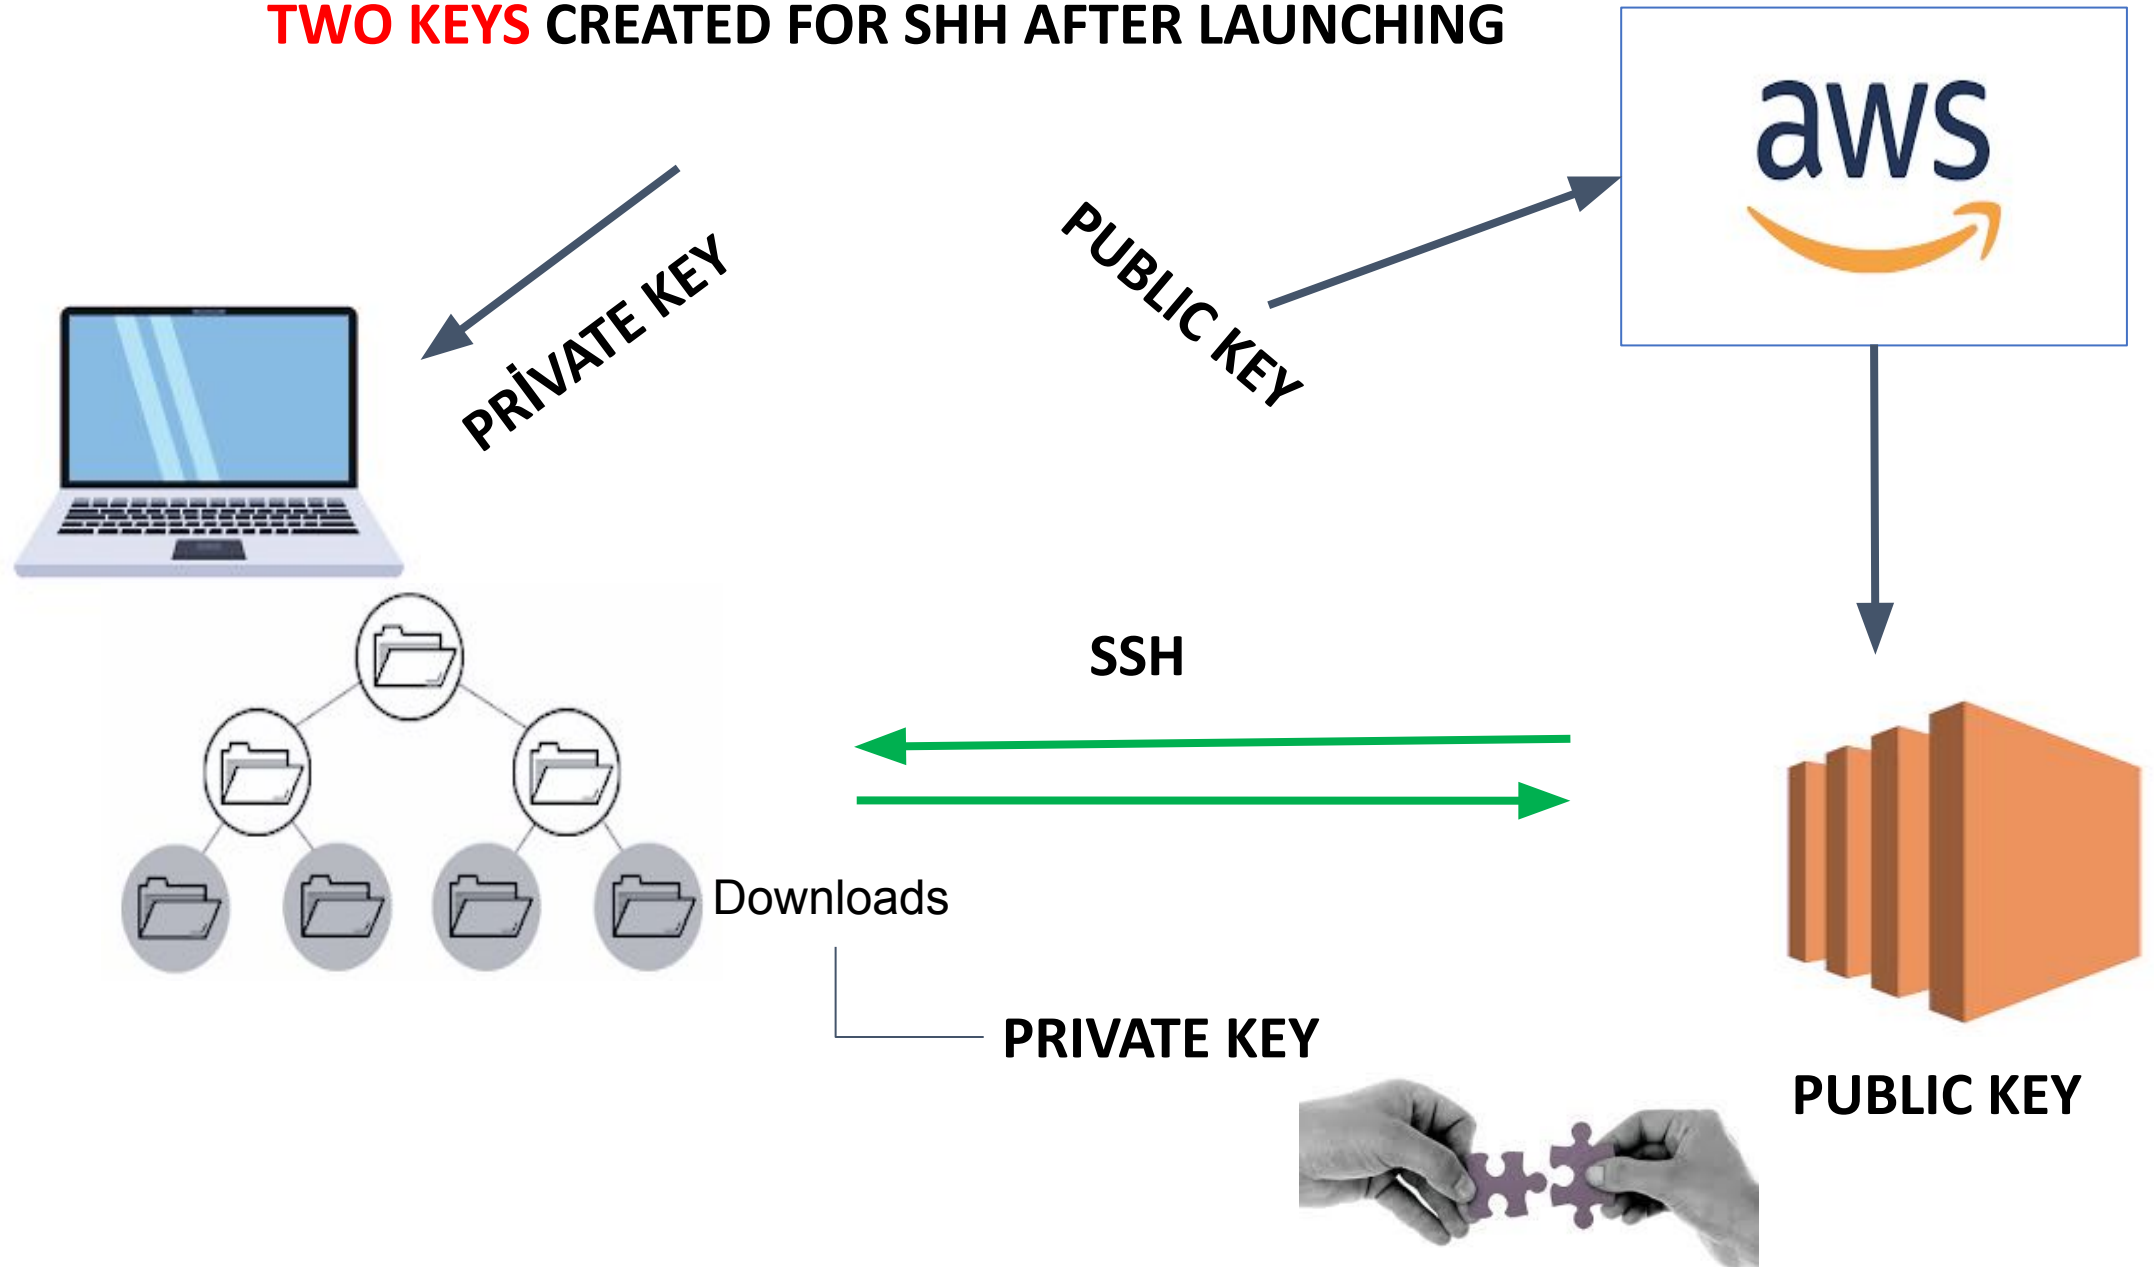

defines who can **join** the party

Outbound Rule

defines who can **leave** the party

## TWO KEYS CREATED FOR SSH AFTER LAUNCHING

Go the directory of folder where your key.pem is located

## Connect

Linux/Mac

Git Bash  
Windows 10 Powershell

WSL

```
cd Downloads  
ls  
firstkey.pem
```

```
cd \Downloads\  
ls  
firstkey.pem
```

```
cd /mnt/c/Users/Osvaldo/Downloads  
ls  
firstkey.pem  
cp firstkey.pem ~  
cd (go to home directory)  
ls  
firstkey.pem
```

---

```
chmod 400 firstkey.pem
```

---No chmod 400---

```
chmod 400 firstkey.pem
```

```
ssh -i firstkey.pem ec2-user@publicIP of Instance
```

`cp firstkey.pem ~`
